LEGEND

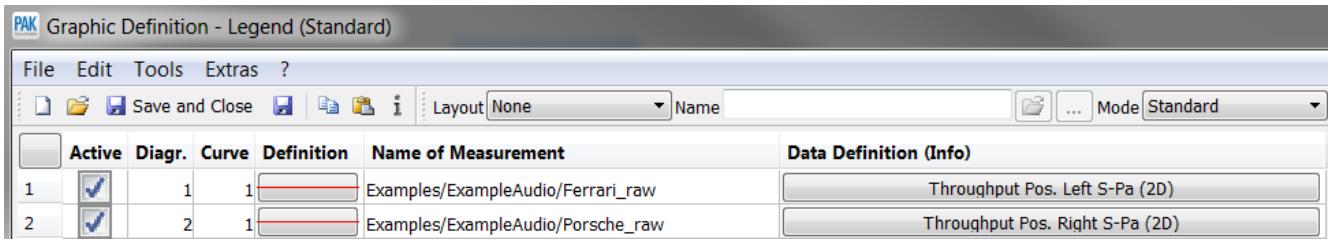
This tip shows new functionalities of the legend available in PAK 5.10. It allows to create a personalized legend easily and quickly without a layout.

1. GRAPHIC DEFINITION

We create a new « graphic definition » named « Legend » , where we will have 2 diagrams.

1st diagram : throughput of the left side in the measurement “Examples/ExampleAudio/Ferrari_raw”

2nd diagram : throughput of the right side in the measurement “Examples/ExampleAudio/ Porsche_raw”



With « Graphic Output », we get the following view :

2. CREATION OF THE LEGEND

With a right click on the first diagram (in a white area), the option « Legend / Set » is available in order to insert a “default” legend.

3. VAIROUS FUNCTIONNALITIES

Below, you will find some options for a personalized legend.

- ***« Allow free positionning »***

Click on the legend, select « Allow free positionning » and then place the legend where you want.

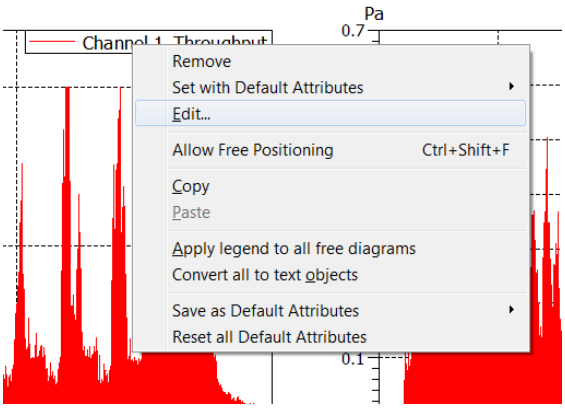
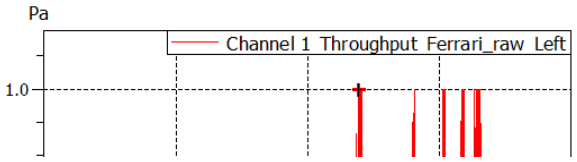
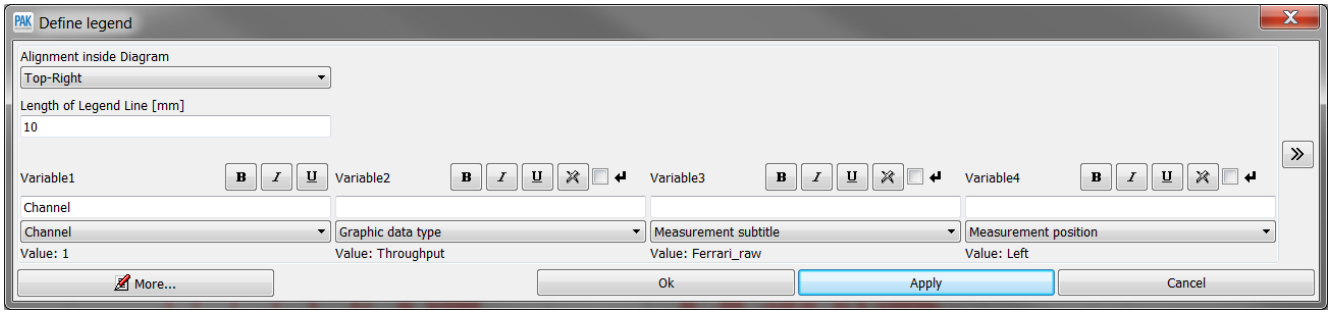
- ***Modify the legend with "Edit"***







- ***"Save as ..."***

Since PAK 5.10, we are able to save up to 3 legend's models. To keep a defined legend, click on « Save as Default attributes » and select one number (here, we choose n°1).

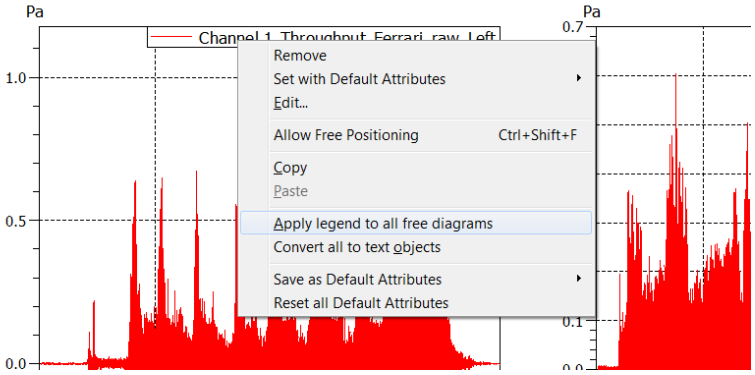
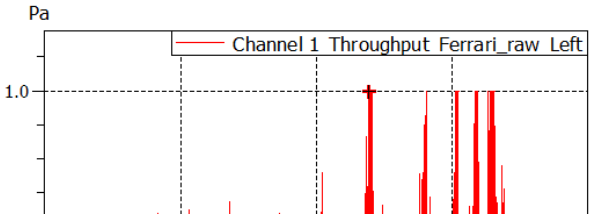
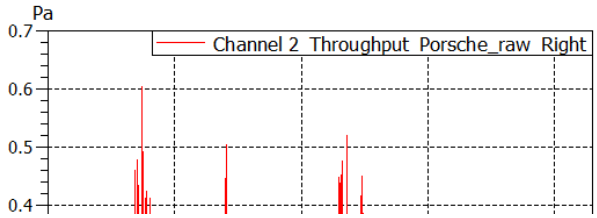
- ***Apply a legend to other diagrams :***

⇨ « Apply to all free diagram »







⇨ Copy one legend on a single diagram

Do « ALT + left click » on the existed legend , and then place it in the second diagram.

- ***Use a legend's model "Set with defaut attributes "***
